

T1020

Digital Terrestrial Receiver

The Freeview approved DishTV UHF T1020 digital terrestrial receiver provides high definition 1080p output via HDMI and full MHEG-5 Freeview EPG.

The T1020 also provides component and A/V outputs for use in either domestic or commercial installations and easy tuning via fully automatic channel search. With MHEG-5 channel updates, new channels are added automatically.

eNet - Internet Features

~ Email Client

The T1020 offers an email client to allow you to check your emails via your TV screen. Your emails are kept private and separate to other users behind your secure profile.

~ Weather

Using an internet connection the T1020 offers free weather updates for main centres.*

~ Maps

The Maps service allows you to view street maps on your TV screen.*

*All of the eNet features require an internet connection via the LAN port on the rear panel of the T1020. The Weather and Map services are provided by secondary providers and are not under the control of DishTV. DishTV can not guarantee the ongoing use of these free services.
